

Fair Rents for Students

We believe that:

1. Students are entitled to decent warm affordable accommodation during their study period.
2. Student rents should be subject to regulatory control through the Fair Rents Bill.
3. Students have the right to represent their housing-related grievances to universities and landlords.
4. The University and Higher Education sector should hold student accommodation for students with disabilities.
5. Students have the right and should be encouraged to form tenants' unions.
6. Students should be encouraged to set up housing Co-operatives.
7. Students should be protected from exploitative practices and their health and safety be ensured during the covid pandemic.
